PROJECT WORK

Crav'n | Front End Developer

MAY 2019 – SEPT 2020

Crav'n is an application that allows users to compare recipes and research restaurants based on their specific cravings.

- Collaborated with a group of three developer utilizing JIRA resulting in a time efficient timeline of completion and seamless collaboration.
- Created a user-friendly interface and developed 30+ client-side components using Vue.js, media queries, Material UI, and Bootstrap for an enhanced user experience and optimized viewing on various screen sizes.

RIPE METRICS | Front End Developer

DEC 2019 – MARCH 2020

Business application that works in tandem with local dispensaries, collecting user reviewed products, transactions, and deliveries.

- Designed user interface and engineered 6+ different feature pages leveraging HTML, CSS, JavaScript and jQuery to maximize the user experience and allow for extra features such as a customer satisfaction survey, previously purchased products, and a product recommender.
- Researched and executed 3 data visualizations using Chart.js to display user satisfaction progression in a line chart, bar chart or polar chart.
